ABSTRACT

The New Jersey Grade 11 High School Proficiency Test (HSPT11) consists of reading, mathematics, and writing sections. All must be passed as requirements for high school graduation. Students who do not pass all sections will receive additional instruction and will be retested on the section or sections they did not pass. The total scores are reported as scale scores with a range of 100 to 500, 300 being passing. One or more sections of the HSPT11 was administered in October 1994 to 61,361 Grade 11 students, a figure that excludes students classified as limited English proficient or in special education. Table 1 presents statewide results for the test. Of the students who took the test the first time, 73.7% passed all 3 sections. Of the 570 retesting students, 24% passed all sections attempted. Results for each subject are included in tables 2 through 6. Finally, the report presents in tabular form (38 pages) district-by-district and school-by-school results grouped by District Factor Group. District Factor Group is an indicator of the socioeconomic status of citizens in each district. (Contains seven tables.) (SLD)

Grade 11 High School Proficiency Test
October 1994

GRADE 11 RESULTS

The New Jersey Grade 11 High School Proficiency Test (HSPT11) consists of three sections--Reading, Mathematics, and Writing--and must be passed as one of the requirements for a high school diploma. Students who do not pass all three sections will receive additional instruction and will be retested on the section or sections they did not pass. The Total HSPT11 Reading, Mathematics, and Writing scores are reported as scale scores with a range of 100 to 500. The passing score is 300.

One or more sections of the HSPT11 was administered between October 18 and 20, 1994 to 61,361 Grade 11 students. This figure excludes those students classified as special education or limited English proficient.

This report includes a series of tables summarizing test results for the State, Special Needs Districts, All Other (not special needs) Districts, and District Factor Groups (DFGs).

Table 1 presents statewide results for Grade 11 students who took the October 1994 test. Of the 61,361 Grade 11 students who took the October 1994 test, 60,791 were Grade 11 first-time testing students and 570 were Grade 11 retesting students. Of the 60,791 Grade 11 students who took the test for the first time, 73.7% of the students passed all three sections. Of the 570 Grade 11 retesting students, 24.0% passed all the sections attempted (whether one, two, or three).

Table 1 also shows that there were 62,761 Grade 11 students regularly enrolled in October 1994. Of the 62,761 students, 71.6% passed the HSPT11 in October 1994. This compares to 72.9% of the 62,598 regularly enrolled Grade 11 students who passed the test in October 1993.

Results for each subject--Reading, Mathematics, and Writing--are included in Tables 2 through 6. Finally, the report contains district-by-district and school-by-school results grouped by DFG. An explanation of the District Factor Groups is included at the end of this report.

The HSPT11 scores in this report exclude special education students, limited English proficient students, and students whose answer folders were voided.

The data in this report are based on information collected from students' answer folders. Subsequent to the distribution of test results in January 1995, there was a procedure for amending student identification information to correct errors that were made when students' answer folders were completed. Corrections to student identification information that were received by the State Department of Education by February 3, 1995 have been included in these summaries.

Highlights from the October 1994 Grade 11 Tables

Special Needs

Of the 10,248 Grade 11 students in the Special Needs Districts who took the October 1994 test, 9,939 were Grade 11 first-time testing students and 309 were Grade 11 retesting students. 40.4% of the first-time students passed all three sections. 16.8% of the retesting students passed all the sections attempted (whether one, two, or three).

All Other

Of the 51,113 Grade 11 students in the All Other (not special needs) Districts who took the October 1994 test, 50,852 were Grade 11 first-time testing students and 261 were Grade 11 retesting students. 80.2% of the first-time students passed all three sections. 32.6% of the retesting students passed all the sections attempted (whether one, two, or three).

District Factor

The percent of Grade 11 first-time testing students who passed all three sections ranged from 35.7% of 8,270 students in DFG A to 96.2% of 344 students in DFG J. The percent of Grade 11 retesting students who passed all the sections attempted ranged from 14.1% of 284 students in DFG A to 41.9% of 43 students in DFG GH and 55.0% of 20 students in DFG FG. In DFG I there were 8 retested students in October 1994; results are not reported when there are 10 or less students in a category. There were no Grade 11 retesting students in DFG J in October 1994.

Reading

Of the 60,733 Grade 11 students tested with the Reading section in October 1994, 50,543 or 83.2% passed the Reading section. Of the 60,768 Grade 11 students who tested with the Reading section in October 1993, 84.4% passed the Reading section. The mean score for the Reading section was 369.3 in October 1994 and 368.8 in October 1993.

Mathematics

Of the 60,728 Grade 11 students tested with the Mathematics section in October 1994, 51,272 or 84.4% passed the Mathematics section. Of the 60,732 Grade 11 students who tested with the Mathematics section in October 1993, 82.4% passed the Mathematics section. The mean score for the Mathematics section was 381.3 in October 1994 and 376.2 in October 1993.

Writing

Of the 60,495 Grade 11 students tested with the Writing section in October 1994, 53,565 or 88.5% passed the Writing section. Of the 60,628 Grade 11 students who tested with the Writing section in October 1993, 92.8% passed the Writing section. The mean score on the Writing section was 361.0 in October 1994 and 373.6 in October 1993.

DISTRICT FACTOR GROUPS

The District Factor Group (DFG) is an indicator of the socioeconomic status of citizens in each district and has been useful for the comparative reporting of test results from New Jersey's statewide testing programs. The measure was first developed in 1974 using demographic variables from the 1970 United States Census. A revision was made in 1984 to take into account new data from the 1980 United States Census. The DFG designations were updated again in 1992 using the following demographic variables from the 1990 United States Census.

A. Percent of adult residents who failed to complete high school

B. Percent of adult residents who attended college

C. Occupational status of adult household members:

1 = laborers
2 = service workers (except private and protective)
3 = farm workers
4 = operatives and kindred workers
5 = protective service workers
6 = sales workers
7 = clerical and kindred workers
8 = craftsmen, foreman, and kindred workers
9 = quasi-professionals
10 = managers, officials, and proprietors
11 = old and new professionals

D. Population Density:

persons per square mile

E. Income:

median family income

F. Unemployment:

percent of those in the work force who received some unemployment compensation

G. Poverty:

percent of residents below the poverty level

The variables described above were combined using a statistical technique called principal components analysis, which resulted in a single measure of socioeconomic status for each district. Districts were then ranked according to their score on this measure and divided into eight groups based on the score interval in which their scores were located. Eight DFGs have been created based on the 1990 United States Census data. They range from A (lowest

socioeconomic districts) to J (highest socioeconomic districts) and are labeled as follows: A, B, CD, DE, FG, GH, I, J. Updating the DFGs has not changed any district's designation as Special Needs or not Special Needs.

Whereas the DFGs based on the 1980 United States Census resulted in 10 groups containing approximately equal numbers of districts, the DFGs based on the 1990 United States Census resulted in eight groups of different sizes depending on their score. The number of districts* in each DFG is now as follows:

DFG	Number of Districts
A	35
B	78
CD	75
DE	100
FG	87
GH	78
I	105
J	15

* Includes all New Jersey's public school districts (regardless of school configuration or grade levels served).
